Career Opportunities

Crop Supervisor

Pine Island Cranberry Co. is looking for a hard-working individual to fill the position of Crop Supervisor. This job offers the opportunity to be an integral part of the crop management team on one of the largest cranberry farms in the world. This specific position focuses on scheduling, coordinating, and aiding in the application of fertilizers and pesticides during the course of the growing season, along with taking part in all the other traditional jobs of a cranberry farm throughout the course of the year.

Timeline & Schedule

- During growing season, schedule will be highly dependent on application schedule and weather conditions. Applications usually begin around 5:30AM
- Work day is 9 hours
- Growing season will include weekend work
- Application season is generally mid-May to end of July
- Otherwise, standard week is M-F, 7AM-4:30PM

Work & Responsibilities

- Coordinating and participating in application of fertilizer & pesticides by both aerial and ground application
- Making sure all safety protocols are enforced and followed
- Keeping precise application records
- Tracking inventory
- When not participating in applications, will help with other crop management activities, such as scouting and moisture management
- Outside of the growing season, will work on the other traditional jobs of a cranberry farm, which include: operating machinery, driving trucks, flooding bogs, sanding bogs, and more

Job Requirements

- Pesticide license or willingness to get one
- Ability to coordinate complex and fast-paced situations
- Hard worker
- Fastidious recordkeeping
- Attention to detail
